MARUTI SUZUKI TIER-2 VENDOR ASSESSMENT - QUALITY SYSTEMS

Category	Audit Area	Concerning regulation	Category	Judgement: 3 levels (2/1/0)	Remarks
1. Production preparation/ New Product Development	1 Regarding implementation rule of production preparation	1 Do you define the procedure for Product development including the following? -scope of parts, responsibility of each department, control contents/ items?	Others	1	NPD procedure and APQP matrix is available. Weak understanding was observed among the team members.
	2 Regarding management/ implementation by production preparation plan/ report (master plan)	1 Do you implement follow-up to control the schedule and progress of production preparation items? <u>Incl top management</u>	Others	0	1. ECN logbook is not evident As verified the ECN of Apr'24, connector type was changed. However, timing plan for the same was not evident. 2. Many RFQs were recorded. However, for converted businesses, timing plans were not evident. Case verified for Ather project- Enquiry received on Jan'24. No timing plan was evident. 3. As verified the APQP timing plan of Minda corporation project- PCB- Assy- FOB, trial reports are verified. However, only visual inspection is being done. Drawing related parameters were not checked. Inspection standard was not evident. 4. Inprocess inspection reports during trials were not evident. As per timing plan, trial happend on Feb'24. But, inprocess inspection reports during that time were not evident
	3 Defect prevention on the stage of process design by using FMEA/ Matrix diagram	1 Do you consider following items and implement corrective and preventive action to the processes and standards before regular production? -Troubles in the past; -Defect items expected; -Defect items unable to capture at customer; -Defect items difficult to repair;	Others	0	PFMEA procedure is available. PFMEA is not aligned with FMEA AIAG 4th edition. Action criteria is defined on the basis of RPN target. SO, SD matrix to be used. 2. PFMEA detection ratings were wrongly captured. 3. PFMEA review plan to be made. Occurrence rating backup to be established
	4 Product/ process evaluation at the quality evaluation meeting in each trial	1 Do you prevent defects by quality improving activities of cross-function team to evaluate quality performance?	Others	2	Found OK
2. Regulation for initial production control	1 Regulation for initial production control	1 Do you define following items related to initial production control by standards? -controlled parts; -controlled items; -inspection method; -initial production control period; -a person who announce start/ end of initial production control; -finish condition;	Others	1	IPC procedure is available. IPC termination sheet format to be made to monitor the control items like customer complaint, inhouse complaint etc. on monthly basis
		2 How do you define items required special control during initial production control? Do you set stricter inspection methods than the ordinary inspection?	Others	0	IPC implementation is not being done for any project. Eg- Certain PCB projects SOP were done recently.- However, IPC was not done
	2 Implementation of initial production control	1 Do you control process capability and defect rate during initial production control?	Others	0	No Implementation done under IPC by the team. Weak understanding.
3. Changing management (Critical Clause)	1 Definition and implementation of changing management	1 Do you define unexpected change (unusual) and planned change clearly?	Others	2	4M change WI is available- Found OK
		2 Do you define procedure (rules applied from sharing information to result confirmation) at change occurrence?	Others	0	4M change was not done for new operator adequately. As verified the production record, Dablu worked on the SMT line for the 1st time on 18.04.25. However, 4M change for the same was not captured. Instead, 4M change was captured on 14.04.25. However, on that day he didnt work on the machine as per production report. 2. As per the production report dated 18.04.25, machine trouble was observed in SMT line. 4M change for the same was not captured. 3. Production plan vs actual was not achieved in Apr'25 in many dates. Production losses for the same was not captured. 4. Production monitoring of MI line observed to be weak and in non standardised format. No production plan vs actual, operator names are being recorded in MI line.
		3 Do you record product quality check results to ensure traceability? <u>Incl retroactive checks</u>	Others	1	During containment inspection for new operator, parameters checked during inspection is not being recorded. As verified the containment report of " Dablu" dated 14.04.25, 20 pcs were checked in containment inspection. However, inspection parameters were not recorded
	2 Definition and control method for initial part	1 Do you define <u>and control</u> initial part clearly?	Others	1	Initial part control area is available. IPP tags to be used for Initial parts identification
		2 Do you control initial parts separately and make quality records about them (both internal and outsourced process are included)?	Others	2	Found OK
4. Standards management	1 Procedure to make process control standards (QA process charts)	1 Do you make <u>and review</u> process control standards, <u>inspection specifications, Operation instructions</u> for all products which is shipped to SMC/ MSIL/ Tier 1?	Others	2	Found OK
	2 Procedure to control standards ▪ Process control standards ▪ Inspection specifications ▪ Operation instructions	1 Do you have consistency to keep process control standard, inspection specification, operation inspection and parameter chart?	Others	2	Found OK
5. Education and training (Critical Clause)	1 Education/ training procedure	1 Do you clarify the department in charge of promoting quality education, implement education based on annual plan? Are records of education kept?	Others	2	Training Procedure (P/QMS/05) Staff induction backup checked – Satyam Yadav, Bhuvan Chandra, Chandan – Found OK TNI followed for evaluation and annual training plan- Found OK Competency gap analysis conducted for TNI evaluation - Found OK Annual training plan (F/HRA/02) – Trainings conducted as per the plan and effectiveness evaluation followed – Found OK Operator induction backup checked for Kamlesh (26.05.25), Harshit Pandey, Anuj Kumar – Initial skill level test paper taken during induction
		2 Do you define and implement the skill evaluation of operator to determine whether operator can work without surveillance? (e.g. acceptable level/ evaluation frequency/ evaluation method)?	Others	1	1.Minimum skill level for inspector is currently defined as Level-2 (Can work under supervision) – Needs to be revised to Level-3 (Can work independently) Skill matrix available – Found OK
	2 Education for managers/ Inspectors/ Special operators	1 Do you periodically monitor the skill of certificated operators and follow up to improve their skill?	Others	2	Skill Re-evaluation followed half-yearly – Found OK 1.All inspectors are not covered in the poison cake test – Checked for Mamta (MI – Inspector), Dharamjeet Kumar (QA – Inspector)

MARUTI SUZUKI TIER-2 VENDOR ASSESSMENT - QUALITY SYSTEMS

Category	Audit Area	Concerning regulation	Category	Judgement: 3 levels (2/1/0)	Remarks
6. Quality audit and process verification	1 Activity to keep/ improve production quality	1 Do you conduct quality audit to identify issues and properly improve them?	Others	1	Mr. Vindo did audit of NPD during internal audit planned on Jul'24. However, as per auditor list, he is working in NPD department only. Auditor shouldn't do audit of his own department
	2 Content of process review	1 Do you confirm consistency between actual operation and standard?	Others	1	As verified the process audit report of 732.125-40 dated 12.05.25, actual values were not recorded for variable parameters. Eg- certain parameters like squeeze front and rear pressure, throwing time etc are being checked but actual values are not recorded
		2 Do you confirm if countermeasures are taken properly to prevent reoccurring of quality failure?	Others	2	Found OK
7. Supplier control	1 Evaluation method for new suppliers	1 Do you define criteria to certificate new suppliers and implement them?	Others	2	Found OK
8. Handling abnormality in quality (Critical Clause)	1 Handling when abnormal situation occurs	1 Do you define clearly what is abnormal situation and make operators know the definition?	Others	1	Abnormal situations awareness among operators to be improved.
		2 Do you clarify and standardize the handling rules/ routes for customer claims, in process failure and supplier failure?	Others	2	Found OK
		3 Do you have criteria to estimate the scope of suspected lot for abnormal situation? When abnormal situation occurs, do you trace suspected lot based upon the criteria?	Others	2	Found OK
	2 Prevention of recurrence • Customer claims • In process failure • Suppliers failure	1 Do you prevent recurrence of issues by analysing cause of occurring defect based on process investigation result such as 5-why analysis?	Others	0	1. Supplier complaint handling to be improved. Issues observed through suppliers are not recorded in supplier complaint register. No analysis is being taken from suppliers. 2. Daily rejection recording to be improved. Currently, rejections are entered in excel sheet through rejection tags. However, a system/format to be made for realtime rejection recording at inprocess and final stage.. 3. Why why analysis for inhouse complaints to be improved. As verified the inhouse analysis report of may'25 against top defect of SBR, countermeasure was taken on trianing part. However, system related rootcause and countermeasure to be taken. 4. Customer complaint analysis to be improved. As verified the customer complaint of Motrex in May'25, LED damage was the defect. Significant causes of transportation damage and damage during packing was established. However, why why analysis during packing process was not established. Also, countermeasure against rootcause established of " damaged during transportation" was not defined.
		2 Do you reflect corrective action to improvement of process control and review of standards?	Others	1	Review of standards to be ensured for customer complaints
		3 After corrective action are taken, do you conduct on-site check up and evaluate the effectiveness? <u>And horizontal deployment.</u>	Others	1	Horizontal deployment to be ensured for inhouse and customer issues.
9. SS management	1 Location of production site	1 Do you keep store material, work-in-process, finished products, inventory and container at appropriate storage prevented from dust, rust, scratch, deformation and rainwater?	Others	2	Found OK
		2 Do you control material, work-in-process and finished product by designated location, volume and standard using visual control?	Others	2	Found OK
		3 Do you implement inspection or critical operation under the properly controlled environment luminance/ temperature/ humidity/ vibration/ noise/ work table, etc.)?	Others	2	Found OK
	2 Production equipment's management	1 Do you keep condition of production equipment's, jigs and tools properly?	Others	2	Found OK
		2 Do you keep condition of inspection equipment's properly to ensure accuracy?	Others	2	Found OK
10. Equipment/ Inspection equipment's management (Critical Clause)	1 Maintenance of equipment's , jigs and tools	1 Do you conduct daily/regularly check of production equipment's, dies and jigs? Are records of maintenance kept?	Others	1	Machine Maintenance Procedure (P/QMS/17) PM Plan available (F/MNT/03) – Execution done as per the plan Critical spare list available – Found OK (F/MNT/23) 1. Corrective actions are being noted under preventive checkpoints in the breakdown analysis sheet 2. All breakdowns are not being captured or analyzed in the breakdown summary sheet I/e- 124 min breakdown in SMT Line-3 on 05.08.2024 25 min breakdown in SMT Line-3 on 18.04.2025 Machine history cards available – Found OK
		2 Do you confirm regularly the function of Pokayoke, automated stop and alarm? Are records of maintenance kept?	Others	1	Pokayoke failure analysis defined in the procedure. Pokayoke checksheet available 1. Door sensors to be included in the Pokayoke checksheet
		3 Do you standardize frequency of polishing and replacement for consumable tools (blade/ electrode/ rub stone, etc.)?	Others	2	Found OK
	2 Maintenance of inspection equipment's	1 Do you calibrate regularly inspection equipment's and put the expire date on them?	Others	2	Found OK
		2 Do you control deterioration (expire date) of boundary samples for objective judgments such as appearance inspection?	Others	2	Found OK
11. Implementatio n of standards	1 Implementation of standards	1 Do you use easy expression (visualizer, onomatopoeia, etc.) for operation instructions? So that operator can easily understand process and critical points.	Others	1	Unloading WI to be made to capture OK and NG packing conditions
		2 Do you keep operation instructions on the accessible place and post important quality points and critical operation points on the place where operators can see it easily?	Others	2	Found OK
		3 Do you regularly monitored that each operator operates according to the operation instructions?	Others	2	Found OK
		4 Is it possible to judge OK/NG specifically by each check sheet (of daily equipment check, quality control report, etc.) you use?	Others	1	Soldering cleaning time is defined as 3- 5 sec in SMT line. Monitoring of the same should be done
		1 Do you keep first-in first-out of finished products and work-in-process (material, reserve parts) by using identification tag or lot indication?	Others	2	Found OK

MARUTI SUZUKI TIER-2 VENDOR ASSESSMENT - QUALITY SYSTEMS

Category	Audit Area	Concerning regulation	Category	Judgement: 3 levels (2/1/0)	Remarks
12. Products management	1 Management of parts flow	2 Do you control follows production history by product lot numbers? -production date; -production volume; -shipping date.	Others	2	Traceability found OK
		3 Do you control identification of similar parts separately?	Others	0	WI to be made
	2 Non-confirming parts management	1 Do you control identification of non-confirming parts and parts on hold. Do you store them separately?	Others	2	Found OK
		2 Regarding repaired non-confirming parts and parts on hold to re-use, do you define responsibility to implement? Are repair record kept?	Others	2	Found OK
13. Handling Management	1 Bins/ Trolley Management	1 Do you make arrangements with customers about the packing style & transportation system to prevent damage during handling of finished products & perform accordingly?	Others	2	Available at Packaging area-Found OK
		2 Do you have system to maintain Bins/ Trolleys in Good Condition?	Others	2	Found OK
14. Critical parts Management	1 Maru A Parts Management	1 Do you have Special checks/ Inspection for Maru A parameters of Maru A part are available?	Others	NA	NA
		2 Do you have Identification of Maru A Process/ Operator on Shop Floor?	Others	NA	NA
		3 Do you keep the repair history when repairing & using Maru A items?	Others	NA	NA
15. Adequate testing facility	1 Testing Facility	1 Does the supplier has all inspection instruments required as per drawing requirements?	Others	2	Found OK
		2 Does the supplier has all Testing Equipment/ Rigs required as per drawing requirements?	Others	2	Found OK
		3 Does the Supplier has trained manpower to operate these inspection and testing instruments?	Others	1	Instrument wise skill matrix to be made
16. Process Audit	1 As per PCS	1 Conduct process audit as per process control standard	Others	2	Found OK
		2 Closure of all the observations	Others	1	Last audit observations to be closed

MARUTI SUZUKI TIER-2 VENDOR ASSESSMENT - EHS

Category	Audit Area	Concerning regulation	Category	Judgement: 3 levels (2/1/0) or 2 levels (2/0) as applicable)	Remarks	Levels of Scoring
17. Financials	1 Plant Sales Turnover	1 Plant Sales Turnover for the auditee plant. Group Turnover	Others	2	141 Cr	0,1,2
	2 PAT / Net Sales (%)	2 PAT / Net Sales (%)	Others	1	4.21%	0,1,2
	3 Total Debt/ Equity Ratio (times)	3 Total Debt/Equity Ratio (times)	Others	2	0	0,1,2
	4 Return on Capital Employed (%)	4 Return on Capital Employed (%)	Others	2	31.06%	0,1,2
	5 Internal Cash Generation / Net Sales (%)	5 Internal Cash Generation / Net Sales (%)	Others	1	5.29%	0,1,2
	6 Debt Service Coverage Ratio	6 Debt Service Coverage Ratio	Others	2	26.38	0,1,2
	7 Current Ratio (times)	7 Current Ratio (times)	Others	1	1.11	0,1,2
18. Safety	1 Working Conditions	1 Is layout and escape route on shop floor OK?	Mandatory	2	Found OK	0,1,2
		2 Is Machine Area sufficient enough to allow easy movement of workforce and tools.	Mandatory	2	Found OK	0,1,2
		3 Is shop floor temp, noise level, air quality (fumes) ok? Is Rest Area/Toilets Available?	Mandatory	2	Found OK	0,1,2
	2 Human and Machine Safety	1 Does supplier have safety policy?	Mandatory	2	Available	0,2
		2 Is Responsibility of Safety related activities defined to specific personnel with in the company.	Mandatory	2	Roles defined(F/QMS/03) & Responsibility defined()	0,2
		3 Are Safety Standards made (as per process requirement)	Mandatory	2	Found OK	0,1,2
		4 Are safety standards training provided to all and followed on shop floor as per the procedure?	Mandatory	2	Found OK	0,1,2
		5 Are Operation Control Procedures (OCP/SOP) available wrt Safety & followed properly?	Mandatory	2	Oven In SMT Line(W/PSA/15), SMT(W/PSA/29)	0,1,2
		6 Fire fighting Training and First Aid training given to workers	Mandatory	2	Fire Fighting training-12.05.2025, Conducted by Invotech Precision Engineers First Aid Training-12.05.2025-Conducted by Invotech Precision Engineers	0,1,2
		7 Are Machine Safety systems (Sensors, Two Hand Push Button, Machine Guarding, Emergency Switches, Mechanical Stopper, Cam Guard, etc.) available, As applicable as per Annexure - 1/2? (Ok if all safety condition is OK on all Machines)	Mandatory	2	Found OK	0,2
		8 Is Safety in material movement and tools ensured or not? Defined procedures to be Checked.	Mandatory	2	Found OK	0,1,2
		9 Are PPEs defined as per process and followed as per standards or not?	Mandatory	2	F/QMS/45-Found OK	0,1,2
		10 Accident reporting mechanism defined?	Mandatory	2	WI/HRA/01- Found OK.	0,2
		11 Accidents Data available and maintained?	Mandatory	2	Accident register maintained	0,1,2
		12 Countermeasures against accidents taken and periodic verification being done ?	Mandatory	2	F/HRA/23-Found OK	0,1,2
		13 Availability of Medical/ First Aid?	Mandatory	2	2 First Aid Boxes available-Found OK	0,1,2
		14 Materials Handling Procedure Defined and adhered?	Mandatory	2	W/MSD/16- Found OK	0,1,2
		15 Is Risk Assessment done and documented for Routine and Non Routine Activities. Documents to be verified.	Mandatory	2	F/HRA/26-Found OK	0,1,2
		16 Are pits and floor openings covered or otherwise guarded?	Mandatory	2	Found OK	0,2
		17 Are paint spray booths, dip tanks, Exhaust Ducts etc.cleaned regularly?	Mandatory	NA	NA	0,2
		18 Lockout/Tagout Procedures established and rigidly followed?	Mandatory	2	LOTO Procedure(P/QMS/48)	0,1,2
		19 Are License, operating permits and records up-to-date for such items as Lift, Boiler, air pressure tanks, and liquefied petroleum gas tanks?	Mandatory	2	Pressure Vessels test certificate- Found OK Lift Licence-Found OK	0,1,2
		20 Is HSD Storage license (>2500) Available	Mandatory	NA	NA	0,2
	3 Fire Safety	1 Audit Conducted by reputed 3rd party on MSIL defined check sheet? < Audit report should not be more than 3 Years old, if Green and not more than 1 Year old if not green>	Mandatory	2	"OK"-MACE-15/04/25	0,1,2
		2 Countermeasure Plan available with defined timelines (not more than 6 months from data of audit)	Mandatory	NA	NA	0,1,2

MARUTI SUZUKI TIER-2 VENDOR ASSESSMENT - EHS

Category	Audit Area	Concerning regulation	Category	Judgement: 3 levels (2/1/0) or 2 levels (2/0) as applicable)	Remarks	Levels of Scoring
19. Top Management bandwidth & HR Practices	1 Management Bandwidth & Organization Structure	1 Do you have adequate organisation structure and defined roles/ responsibilities for key areas such as Plant Head, Quality, Production, Maintenance and Safety?	Others	2	Roles defined in the ORG(QMS/01), Responsibilities defined Found OK	0,1,2
		2 Is HR Structure and HR person Available and responsibilities defined	Others	2	Roles defined in the ORG(QMS/01), Responsibilities defined Found OK	0,1,2
	2 Review Mechanism	1 Does Top Management monitors the Safety parameters and verify the countermeasures implemented on monthly basis?	Others	2	1.Monthly Safety KPIs needs to be reviewed by the MD	0,1,2
	3 Statutory Compliance	1 Is Child Labour Policy Available ? (not less than 14 years)	Mandatory	2	Child Labour policy available-Found OK	0,2
		2 Is Minimum wage being paid as per skill level ?	Mandatory	2	Followed as per state Govt	0,2
		3 Factory license Available and valid?	Mandatory	2	Valid Till- 31st Dec-2026	0,2
		4 Contractor license Available and valid?	Mandatory	2	Found OK	0,2
		5 Standing orders there or not. (appl. where >100 workmen are employed on any day of the last 1 year)	Mandatory	2	Found OK-Dated 23/04/25	0,2
		6 Is POSH policy available and compulsory trainings given for the same.	Mandatory	2	POSH Policy available(Annexure 4), Training conducted on 17.05.25	0,2
	4 Consent to Operate	1 Consent to operate (Valid as on date) available or not (Air & Water)?	Mandatory	2	NOC Available-22/11/2019(Dated)	0,2
	5 ESI & PF	1 Are eligible workers or employees, are covered or entitled under ESI?	Mandatory	2	Found OK-Checked for Shiv Shankar, Manoj Kumar,Rajkumar Pandey	0,2
		2 Is PF contribution of employees and employers are done ? (The due date for Monthly Challan remittance to Bank for PF is 15th of Every Month)	Mandatory	2	Found OK- Checked for Shiv Shankar, Manoj Kumar,Rajkumar Pandey	0,2
		3 Management reviews the status of ESI/ PF contributions payment? (Due date for payment of ESIC is 15th of following month.)	Mandatory	2	Found OK	0,2
		4 If ESI & PF managed by Contractor, then does management reviews and checks the ESI enrolment/ payments?	Mandatory	2	Found OK	0,2
	6 Hazardous Waste Management	1 Are different type of wastes identified on shop floor and standards/ Procedures made?	Others	1	Waste Segregation procedure(P/QMS/13) Waste Matrix to be made	0,2
		2 Is Segregation done at source for different type of wastes? Storage and disposal being done as per consent and periodic confirmation at disposal stage?	Others	2	Found OK	0,1,2
